MAY WE INTRODUCE OURSELVES?
WE ARE SPS ELECTRONIC

YOUR PARTNER FOR
ELECTRICAL SAFETY TEST TECHNOLOGY

www.spselectronic.com
Welcome to SPS electronic

We are the technology-loving experts for electric testing equipment from the heart of Germany. We develop our products from the conviction to only offer the best quality. In doing so, we have always been oriented towards typical German values, such as reliability, accuracy and perfection – in every area. From product development via customer advice to individual support. In short, with SPS electronic you are always on the safe side.
Our **work** – safety testing 360°

At SPS electronic you will find an all in all offer of safety test technology and everything that goes with it.

---

**Customised test systems**

**Serial devices**

**Software**

**Accessories**

**Consultation beforehand**

**Commissioning**

**Seminars**

**Calibration**

**(Remote) Maintenance**

**All around after-sales**

---

For 40 years, SPS electronic has designed and produced test technology in the field of electric safety, selling it worldwide. In doing so, our main focus is on providing safety and function testers as well as a wide selection of suitable accessories. Always at the latest state of the art and, of course, in best quality.

But apart from the continuous extension and further development of our product range, we are specialised in developing test and checking systems that are individually tailored to customer requirements. Thus, we also look after implementation apart from planning.

And it goes without saying that this takes place with highest claims. Because no matter what test problem you face – we will always find a solution.

We round off our product range with a reliable **full service**. This includes, for example, our comprehensive advice prior and after the purchase, the installation as well as the repair of appliances, if necessary. And this even applies when it is a third-party product. Furthermore, we offer worldwide training courses and seminars as well as comprehensive online support, covering all topics – from mere product use to safe handling of the test technology.
For many years, we’ve been establishing worldwide subsidiaries and a broad sales and service network. All have the same quality standards and specialise in the requirements for their region. Like this, we’re always there where our customers need us.
Our strengths – your advantages

Characteristics, that our customers worldwide appreciate.

We are competent…
...because we are capable of what we do! For 40 years, we have been developing and producing test technology in the area of electrical safety and have been selling them worldwide. From individual planning, development through to support – with our help, you can always be sure to have an experienced partner at your side.

We are obsessive with technology…
...because only those who give their best can convince! We are specialised in creating test and inspection systems that are individually tailored to customer requirements. In doing so, we grow with each challenge and always find the perfect solution – regardless of what testing task you are faced with.

We are innovative…
...because only those that improve, move forward! Our test systems as well as our serial devices and matching accessories are continuously further developed and thus, we are always one step ahead.

We attach great importance to SERVICE...
...because the satisfaction of our customers is what matters most to us. Our service does not come to an end with the delivery of a test system: we are also there to help you with the commissioning of the system.

True German Quality – This is SPS electronic

Good things can be so close at hand – Our distribution and service center:

Find yourself in good company

Headquarters in Schwäbisch Hall
Our field of application – cross-industry

SPS electronic always offers the right test solution – no matter if it’s for luminaires, motors or medical equipment.

Electric motors

Lighting industry

Medical technology

Power tools

Powertrains

Household appliances

Automotive industry

You need to test – we have the right solution.

With our products, we generally offer a suitable solution for all tasks in electric safety testing. However, it can happen that very special requirements apply to a particular test task. Be it in the terms of sequence of the parameters to be tested, the conditions under which it shall be tested, or also the kind in which the approval of the test finally takes place. Here we are once again happy to assist you – with special solutions that are fully tailored to your individual needs and desired requirements. The industry is secondary in that regard – whether it involves motors, lighting fixtures, tools or even medical equipment: Decisive is always the type and procedure of the testing.
Customised test systems – and everything related

We inspire our customers with the almost unlimited combination possibilities of functions, test methods and components.

Safety and function tests

- Ground bond tests
- High voltage tests
- Insulation tests
- Leakage current tests
- Surge tests
- Partial discharge test
- Resistance measurement
- Current power measurement
- Leakage test

...and many more!

Software

- Creation of test plans
- Tests
- Browsing of test protocols
- Network connection
- Data exchange with IT-systems

Interfaces / DUT connection

- SAP
- SQL
- CRM

...and many more!

Workplace design
Our Service – Everything from a single source!

When it comes to service we do it thoroughly. The products we offer come with the appropriate advice and support – before and after purchasing. Do you have a question? Need a replacement part or support? Call one of our experienced team members:
+49 791 20 212 327

Regular firmware updates
All testers from SPS electronic always come with up-to-date software. We provide you with regular firmware updates to stay on the cutting edge of technology also in the course of operation of the device. You can download the latest version on our website:
www.spselectronic.com

Service for unit on loan
No loss of time – even if your equipment and systems are under repair or maintenance.
Numerous loaners are available from the product range of SPS electronic for the duration of the repair of your equipment. Whether they are hipot testers, insulation testers, ground bond testers, leakage current testers or multifunctional units. We also provide a trial unit if you are unsure about the new unit you want to buy. Just let us know about it!

OEM spare parts service
Using our OEM spare parts ensures optimum performance and maximum service life of your equipment. We at SPS electronic supply you with the spare parts for all device types and generations worldwide. Common spare parts are immediately available from stock. Should we not have something in stock, we will produce or procure it as quickly as possible.

After-sales support
We start exactly there, where others give up! And that is why our service does not end with the purchase of one of our units. We want you to have long-term satisfaction with us and our products. Especially for this purpose, we have a large service team that is always on-hand with technical advice and support.

On-site service
We are at your service wherever you need us! The optimum support provided by our service technicians restores the operation of your devices and customised systems. Our customer-focused field service is tailored to your needs, so as to consistently meet your technical requirements. We will work out the repair and maintenance plan jointly with you, to keep the downtime of your systems and equipment at a minimum.

Seminars and training programs
Get the best from your testers! The effectiveness of your equipment and customised systems not only depends on the technology but also its proper handling. We offer training programs that focus on the issues, needs and testing tasks of our customers. We first analyse the training needs together with you and then specifically design the contents according to your requirements. Thus, you get to know your safety tester in a practical and application-oriented way.

Remote service
Our service is also remotely available as an alternative to our on-site support. This saves considerable time and significantly reduces the costs especially when it comes to sites that are far away.

Calibration and maintenance
The annual calibration of the testers is an essential prerequisite for the assured quality and is a requirement to be met by any company as part of the control of inspection, measuring and test equipment. We calibrate your safety testers – either directly at your location or in our premises. Thanks to our large service network, our numerous subsidiaries and our partners, we are represented worldwide and always close to you.

The special extra — the calibration service of SPS electronic

Because a calibration is not just a calibration, customers worldwide rely on our expertise.

IF A "SIMPLE" CALIBRATION IS NOT SUFFICIENT: DAKKS CALIBRATION ACCORDING TO DIN EN ISO / IEC 17025

We are very pleased to have recently received the official accreditation certificate and the certificate for our calibration laboratory in Twist from the DAkkS (Deutsche Akkreditierungsstelle / national accreditation body for the Federal Republic of Germany). This means that we are retroactively authorized to offer accredited calibrations according to DIN EN ISO / IEC 17025 since November 2019 (a competence that only very few laboratories can provide). The final accreditation was preceded by about 5 years of preparation and a lengthy accreditation process – a period of time which, last but not least, makes clear the great importance of this success.

WHAT ARE THE CHARACTERISTICS OF A DAKKS CALIBRATION?

DAkkS calibration certificates are valid at any time, internationally and without further valid proof of traceable measurement results. They are issued with standards whose traceability is guaranteed by DAkkS certificates or calibration certificates issued by PTB laboratories. DAkkS calibration certificates can only be issued by the accredited calibration laboratories within the scope of the accredited measured quantities. This ensures that high quality calibration is guaranteed by regular external assessment and re-accreditation, traceable standards, precisely defined environmental conditions and specially trained personnel.

WHAT IS THE DIFFERENCE BETWEEN A DAKKS AND A TRACEABLE FACTORY CALIBRATION?

The DAkkS calibration according to DIN EN ISO / IEC 17025 becomes necessary if special requirements demand it. This procedure has no influence on the traceability of the measured variables. Both the measured variables of the factory calibration and those of the DAkkS calibration can be represented equally. Factory calibration certificates are issued with standards that are subject to regular test equipment monitoring, the traceability of the standards used is ensured by regular test equipment monitoring.

When recalibrating test equipment, which in turn serve as standards for monitoring other measuring and test equipment, a DAkkS calibration should always be used because of the assured traceability to national standards.

You are not sure which calibration you need?

Energy-efficient vehicles with electric drives are on the advance and pose new challenges for automobile manufacturers and suppliers alike. The new electrical components with extremely high currents and voltages pose a considerable danger not only for the user, but also for the safety forces in the event of an accident. This makes it all the more important to subject the individual components of an electric vehicle to a thorough electrical safety test before they leave production.

In the past, cars were uninteresting for SPS electronic because there was no dangerous voltage. Electric cars, on the other hand, require testing – not only the car itself, but also accessories such as the charging station, batteries, wiring harnesses etc. Due to the increased voltages in the electric car (from 12 volts to up to 800 volts), the requirements for electrical safety and functional testing have increased considerably. What is completely new for the automotive industry is already widely used technology for SPS electronic. Thanks to its long-term expertise, SPS electronic is able to competently advise its customers all the way from project planning to acceptance.

The comprehensive, worldwide service is controlled from the branch Twiste (Northern Germany), while the development and production mainly takes place in the main factory Schwäbisch Hall. Due to the high capacity utilization, parts of the production could also be outsourced to the Czech subsidiary Chomutov in the past years. In fact, sales growth in this business segment is already in the mid-double-digit range and is continuing to rise. This development requires not only internal preparation of professional profiles for new tasks, but also the creation of numerous new jobs.
